

Transplant Scorecard No.23 September 2014

The September 2014 Transplant Scorecard reflects a most welcome quarterly increase in the number of transplant recipients in Australia for the year, Jul'13 – Jun'14 (1095) to Oct'13 – Sep'14 (1143). Since the establishment of Organ and Tissue Authority (OTA), yearly transplant recipients per million population have increased from 39.4 (Dec 2008) to 48.3 (Sep 2014), an increase of 3.9% per annum. Australia's ultimate goal of 80 to 90 transplant recipients per million population can only be achieved if proven leading performance solutions to organ donation and transplantation are fully and effectively implemented. Given the aim to establish Australia as a world leader in organ donation for transplantation, ShareLife Australia is calling on the government to completely implement the internationally recognised proven solution to achieve world's leading performance.

	Transplant Recipients per Million Pop p.a.	Total Transplant Recipients p.a.
Required number of transplant recipients from deceased donors to reach the target set by the Leading Transplant Countries	90	2,131
Actual number of transplant recipients from deceased donors for the period Jul'13 to Jun'13 in Australia	48.3	1,143
Number of Australians who could have benefited from a life transforming transplant if Australia achieved rates equal to the Leading Transplant Countries		988
