

Transplant Scorecard No.33

March 2017

The March 2017 Transplant Scorecard reflects an decrease in the number of transplant recipients in Australia for the 12 months, Jan'16 – Dec'16 (1448) to Apr'16 – Mar'17 (1438). Since the establishment of Organ and Tissue Authority (OTA), 12-monthly transplant recipients per million population have increased from 39.4 (Dec 2008) to 58.7 (Mar 2017), an increase of 5.9% per annum. Australia's ultimate goal of 80 to 90 transplant recipients per million population can only be achieved if proven leading performance solutions to organ donation and transplantation are fully and effectively implemented. Given the aim to establish Australia as a world leader in organ donation for transplantation, ShareLife Australia is calling on the Government to completely implement the internationally recognised proven solution to achieve world's leading performance.

	Transplant Recipients per Million Pop p.a.	Total Transplant Recipients p.a.
Target number of transplant recipients from deceased donors set by the Leading Transplant Countries	90	2,203
Actual number of transplant recipients from deceased donors for the period Jan'16 to Dec'16 in Australia	58.7	1,438
Shortfall number of additional Australians who could have benefited from a life transforming transplant if Australia achieved rates set by the Leading Transplant Countries		765
